

Still Have HHABN Questions?

You're not alone.

Two months after the deadline,
most home care providers say they do.

Get the HHABN tools you need for as little as \$225!

Two months have passed since Medicare's new HHABN requirements went into effect and questions continue to frustrate home care providers. "*Just give us accurate information,*" has become the cry in home care offices and across telephone lines.

The Oklahoma Association for Home Care has heard your cry and has made an arrangement with the Home Care Information Network us to offer its **Complete HHABN Educational Package** to OAHC members for \$225. Non-member price is still reasonable at \$295. HCIN's complete package includes:

- Unlimited access *for an entire year* to both the Administrator's implementation seminar and the Clinician's Compliance seminar
 - More than 2 1/2 hours of content
 - CEUs for nurses and administrators
- Copies of handouts for both seminar modules
- Copies of two essential "cheat sheets"
 - Clinician's Quick Reference Guide
 - 16 most frequently encountered scenarios
- Access to our special HHABN FAQ page

HCIN seminars are video streamed to your staff over the Internet. They can be viewed on any Internet-connected computer, day or night. OAHC has partnered with HCIN and highly recommends this training method.

In just the last three months, nearly 30% of Medicare-certified home care providers have viewed these HHABN seminars. OAHC partnered with them because we believe this is a cost-effective and convenient training system for our members.

Thousands of home care clinicians and executives have already turned to HCIN for training on a long list of topics. Their reactions are enthusiastic:

"I love the fact that we do not have to gather the whole staff at the same time and place to get our training done."

"It's like attending a live seminar with top experts, but without the travel and hotel expenses."

"I have only taken two seminars so far but I have decided to use HCIN for all my staff training from now on."
